2 Introduction and Background to the Project / Programme

2.1 Climate change has become one of the most serious environmental problems in the 21st century, threatening not only public health and food security but also exacerbating natural calamities such as floods, wildfires and erosions making most countries climate vulnerable. In South Asia, countries such as Bangladesh, Pakistan, Sri Lanka and Afghanistan, home to 1.5 billion of the world's population and a significant portion of the global poor (15.8% in Bangladesh, 11% in Afghanistan, 1.9% in Sri Lanka, and 3.8% in Pakistan), are some of the most susceptible to climatic challenges. Gaps in knowledge regarding the social, psychological, economic and political impacts of climate change and the appropriate capacity of stakeholders to address these issues are two key barriers to effective action against climate change within the region.

A climate fund update in 2017 highlights that the four countries mentioned above receive only 32% share of the total funds to meet these challenges further jeopardising the future of the youth in the region. According to the World Bank, in the past decade alone roughly 700 million people in the

South Asia region have been affected by climate change related disasters causing damages worth USD 149.27 Billion. By 2030, the World Bank estimates that climate change could push 62 million South Asians below the extreme poverty line.

The effects of Climate Change are worst on the young people who constitute one fifth of the total South Asian population comprising of 300 million, putting countries like Pakistan, which has one of the largest youth populations in the world, at greater risk. Given the sizable youth population, young people, who will be most affected by these challenges in the coming years. They will need education, information and training to be positively engaged in public awareness and participate in disaster mitigation to deal with climate related challenges. Seeing as in the coming years, they will assume the roles of leaders, policymakers and decisions makers, it is critical to engage the youth in action against climate change and developing more equitable and climate-resilient societies.

In order to mitigate climate related disasters, and accomplish goals set out in the SDGs – specifically Goal 13 i.e. climate action – and the Paris Agreement, which reaffirms intergenerational equity as a guiding principle shaping climate change, there is a need for youth centric global, regional and local level interventions, and adaptive strategies to address the threats.

This research aims to develop a deeper understanding of the perceptions, attitudes, challenges and readiness of youth in South Asia around climate vulnerability and their action plan for the looming threats. In addition, based on the analysis, the research aims to make recommendations for effective engagement with youth around climate action, and collect youth narratives from South Asia to present and influence negotiations at COP 26.

This research is primarily a perception and insights survey which will be conducted across 4 countries in the South Asia region namely Pakistan, Sri Lanka, Bangladesh and Afghanistan. In addition to various youth groups – who are the primary target audience, this research also aims to engage a number of stakeholders including policymakers, decision makers, global leaders, academics and more. **We aim to engage individual research firm in each of the 4 countries to conduct the research.**

Stage 1: Tender responses will be checked to ensure that they have been completed correctly and all necessary information has been provided. Tenders responses correctly completed with all relevant information being provided will proceed to Stage 2. Any tender responses not correctly completed in accordance with the requirements of this RFP and/or containing omissions may be rejected at this point. Where a tender response is rejected at this point it will automatically be disqualified and will not be further evaluated.

Stage 2: The completed Qualification Questionnaire (*if used*) will then be reviewed to confirm that the potential supplier meets all of the qualification criteria set out in the questionnaire. Potential suppliers that meet the qualification criteria will proceed to Stage 3. Potential suppliers that do not meet the qualification criteria set out in the Qualification Questionnaire (*if used*) may be excluded from the Procurement Process at this point. Where a potential supplier is excluded at this point, its tender response will be rejected in full and not evaluated further and the supplier will automatically be disqualified from this Procurement Process.

Stage 3: If a bidder succeeds in passing Stages 1 and 2 of the evaluation, then it will have its detailed tender response to the British Council's requirements evaluated in accordance with the evaluation methodology set out below. Information provided as part of Qualification Questionnaire (*if used*) responses may also be verified as part of this stage.

14.2 Award Criteria – Responses from potential suppliers will be assessed to determine the most economically advantages tender using the following criteria and weightings and will be assessed entirely on your response submitted:

Criteria	Weighting
Sector knowledge (climate, youth, skills, employability)	15%
Access to Youth Networks	15%
Track and in-country footprint (data collection, advocacy and comms exp required)	10%
Methodology and Approach	20%
Timetable and staffing	10%
Costing and value for money	30%

14.3 Scoring Model – Tender responses will be subject to an initial review at the start of Stage 3 of the evaluation process. Any tender responses not meeting mandatory requirements or constraints (if any) will be rejected in full at this point and will not be assessed or scored further. Tender responses not so rejected will be scored by an evaluation panel appointed by the British Council for all criteria other than Commercial using the following scoring model:

Points	Interpretation
10	Excellent – Overall the response demonstrates that the bidder meets all areas of the requirement and provides all of the areas evidence requested in the level of detail requested. This, therefore, is a detailed excellent response that meets all aspects of the requirement leaving no ambiguity as to whether the bidder can meet the requirement.
7	Good – Overall the response demonstrates that the bidder meets all areas of the requirement and provides all of the areas of evidence requested, but contains some trivial omissions in relation to the level of detail requested in terms of either the response or the evidence. This, therefore, is a good response that meets all aspects of the requirement with only a trivial level ambiguity due the bidders failure to provide all information at the level of detail requested.
5	Adequate – Overall the response demonstrates that the bidder meets all areas of the requirement, but not all of the areas of evidence requested have been provided. This, therefore, is an adequate response, but with some limited ambiguity as to whether the bidder can meet the requirement due to the bidder’s failure to provide all of the evidence requested.
3	Poor – The response does not demonstrate that the bidder meets the requirement in one or more areas. This, therefore, is a poor response with significant ambiguity as to whether the bidder can meet the requirement due to the failure by the bidder to show that it meets one or more areas of the requirement.
0	Unacceptable – The response is non-compliant with the requirements of the RFP and/or no response has been provided.

14.4 Commercial Evaluation – Your “Overall Price” (as calculated in accordance with requirements of Annex 3 (Pricing Approach) for the goods and/or services will be evaluated by the evaluation panel for the purposes of the commercial evaluation. Prices must not be subject to any pricing assumptions, qualifications or indexation not provided for explicitly by the British Council as part of the pricing approach. In the event that any prices are expressed as being subject to any pricing assumptions, qualifications or indexation not provided for by the British Council as part of the pricing approach, the British Council may reject the full tender response at this point. The British Council may also reject any tender response where the Overall Price for the goods and/or services is considered by the British Council to be abnormally low following the relevant processes set out under the EU procurement rules. A maximum offer score of 10 will be awarded to the tender response offering the lowest “Overall Price”. Other tender responses will be

awarded a mark by application of the following formula: (Lowest Overall Price/Overall Price being evaluated) x 10 (rounded to two decimal places) = commercial score.

14.5 Moderation and application of weightings – The evaluation panel appointed for this procurement will meet to agree and moderate scores for each award criteria. Final scores in terms of a percentage of the overall tender score will be obtained by applying the relevant weighting factors set out as part of the award criteria table above. The percentage scores for each award criteria will be amalgamated to give a percentage score out of 100.

14.6 The winning tender response – The winning tender response shall be the tender response scoring the highest percentage score out of 100 when applying the above evaluation methodology, which is also supported by any required verification evidence (to include, without limitation, any updated information or references relating to any Qualification Question responses) obtained by the Authority relating to any self-certification or other requirements referred to in the Qualification Questionnaire (*if used*). If any verification evidence requested from a supplier, or a relevant third party as may be referred to by the supplier in the Qualification Questionnaire (*if used*) as a party prepared to provide such information, is not provided in accordance with any timescales specified by the British Council and/or any evidence reviewed by the British Council (whose decision shall be final) does not demonstrate compliance with any such requirement, the British Council may reject that tender response in full and disqualify the potential winning supplier from the Procurement Process at that point.
